CSC 4710/CSC6710 - Homework 1

Design and Develop a Database GUI Application

Consider the FIFA World Cup 2026. Suppose we want to develop an application that stores information about players, teams, and matches. Design and implement a database application using Python (using tkinter and sqlite3 package) that provides the following features:

i. Insert/update/delete players
ii. Insert/update/delete teams
iii. Insert/update/delete matches
iv. Display player/team/match information on the UI
v. Search matches for a given team
vi. Search matches for a given player

Notes:

- Submit your Python project and several screenshots of the GUI operations in iCollege folder 'Homework1' by Wed, Oct 14, 2026, 11:59 PM.
- Late submissions will be accepted until Fri, Oct 16, 2026, 11:59 PM (with 0.4 points per hour penalty).
